

1996 06 14 Friday Maj. Ed Dames Remote Viewing – Art's Parts

MAJ. ED DAMES (Time Travel)

ED: "Time Travel by the way is, ah ...ah, quite a real thing out there in the Cosmos as far as we're concerned, ah, you know, having had fifteen (15) years of experience looking at things for NASA and NORAD that they don't talk about.

Ah, vehicles ... races that used, ah, Time Travel and, ah, teleportation – they need time standards, as you know. If you're traveling along a gravity, ah ... ah ... ah, wave, ah, or along a gravity surface and you pop in somewhere, you need to know not only where you are *but what Time it is!*"

AB: "Sure."

ED: "And so pulsars and things similar to pulsars are ... are used to ... to as a galactic time standard, if you will, to know *when* you are rather ... rather than ... than just where you are ... in addition to where you are.

Crop circles for instance are specifically used for on the ground registration marks (!) The crop circles that we talk about – ah, they're still en- ... enigmatic to most people – are for us in Psi-Tech, we know [what] they are (!) *They're purposely put in general media to last only one (1) day (!)* so that you know *on the ground* – right there in a local environment ... a tactical environment, if you will – **what day it is!**"

AB: "Huh!"

ED: *So that when you transmit Time again and you see that specific crop circle that's in a registration, ah, book of some kind, you know what day you are in (!)"*

AB: "All right."

ED: "Cause you know that in that book on that specific day some, ah, registration vehicle made that mark.

It's not a vehicle ... it's actually a small globe. We ... we, well, we will make, ah, that, ah, Psi-Tech contract available to the public by our Transition 3000 website in the future."

AB: "All right.

Let us understand then: Remote Viewing does Time Travel of its own in a sense?"

ED: “*It doesn’t!* It doesn’t.

Time drops out of the equation.

Mind is outside of Time.

There is no Time in the Collective Unconscious.

If I looked at Art Bells like as a remote viewer – a technical remote viewer – I see you from birth to death, ah, and ... and points in-between.

There is no Time there (!)

You are a gestalt of information (!) ... a pattern of information resonant in this Collective Unconscious. That’s not to say you don’t have a soul or a personality – of course you do!”

AB: “Sure.”

ED: “But in terms of ... of information, this is an information collection technology, and there is no Time involved.

We look *left* to see the Past or *right* to see the Future, *metaphorically speaking*, and we just download information.”

AB: “Umm-hmm.”

* * *
